

48" LOW PRO

Low-Profile Design | Maximum Efficiency | Superior Profitability

DRIVE-OVER TRUCK UNLOADER

AGGREGATE AND
MINING GROUP

LOW PRO

The low 3' profile of the 48" Low Pro delivers the convenience, efficiency, ease-of-use and environmentally friendly characteristics your operation demands.

48" LOW PRO

PERFORMANCE

- P1 Low Profile**
3' profile reduces set-up time compared to conventional unloaders which require larger, higher earthen ramps.
- P2 Compact Design**
Easily relocate to multiple set-up locations at various sites.

EASE-OF-USE

- E1 Minimal Site Prep**
Spend time unloading and stockpiling instead.
- E2 Road-Portable**
Eliminate time normally spent transferring the unloader to and from a trailer.

DURABILITY

- D1 Heavy Duty Truck Frame**
Undercarriage easily handles the largest loads.

SAFETY

- S1 Minimize Exposure**
Reduce loader use normally required to build your stockpiles.

CHOOSE THE LOW-PROFILE DRIVE-OVER TRUCK UNLOADER WHEN:

Fast set-up and take-down are important.

The low profile means you'll spend less time building earthen ramps and more time doing the work you're getting paid for.

Cutting down on material degradation and pile loss saves money.

Every pound lost is a pound you have to make up for somewhere down the line. By pairing the 48" Low Pro with the SuperStacker®, you'll make the most of every load.

You care about efficiency and the environment.

Reduce set-up time, labor needs and fuel costs.

PAIR WITH A SUPERSTACKER®

Prevent stockpile segregation and really watch profits roll in when you pair your Low-Profile Drive-Over Unloader with a SuperStacker.

Because we're dedicated to keeping you up and running, we've provided two resources for quality parts and service. Drive-Over Truck Unloader parts and service are available from your local KPI-JCI dealer and/or your local KPI-JCI representative.

Call 605-665-9311 to find the dealer or representative nearest you.

Because KPI-JCI may use in its catalog & literature, field photographs of its products which may have been modified by the owners, products furnished by KPI-JCI may not necessarily be as illustrated therein. Also continuous design progress makes it necessary that specifications be subject to change without notice. All sales of the products of KPI-JCI are subject to the provisions of its standard warranty. KPI-JCI does not warrant or represent that its products meet any federal, state, or local statutes, codes, ordinances, rules, standards or other regulations, including OSHA and MSHAGATOR, covering safety pollution, electrical, wiring, etc. Compliance with these statutes and regulations is the responsibility of the user and will be dependent upon the area and the use to which the product is put by the user. In some photographs, guards may have been removed for illustrative purposes only. This equipment should not be operated without all guards attached in their normal position. Placement of guards and other safety equipment is often dependent upon the area and the use to which the product is put. A safety study should be made by the user of the application, and, if required, additional guards, warning signs and other safety devices should be installed by the user, wherever appropriate before operating the products.

NOTE: SPECIFICATIONS ARE SUBJECT TO CHANGE WITHOUT NOTICE
