

FEED SYSTEMS

Maximize the effectiveness of your entire operation with the seamless compatibility of material feed products from KPI-JCI. Our entire line of feed solutions has been designed using several decades of experience in building aggregate processing and recycling equipment. Couple this experience with versatile and innovative engineering capabilities and you receive the flawless compatibility only KPI-JCI Feeding Equipment can deliver — enabling you to run at peak performance and keep material moving at the rate your operation requires.

BENEFITS

- Maximize your efficiencies by improving material feed points.
- Solutions fit seamlessly into new or existing operations.
- Quality is guaranteed with an industry leading warranty program.
- Excels at efficiently feeding portable or stationary systems.

MODEL	Conveyor	Discharge Height	Motor (electric)	TPH	Ramp Height
2148-50 LP	48" x 50'	6'-8"	30 HP	1000	3'-0"
2148-56 LP	48" x 56'	7'-8" - 11'-5"	40 HP	1000	3'-0"

Seamless Compatibility | Unmatched Efficiency | Excellent Warranty

LOW-PRO™ TRUCK UNLOADERS

Easy and quick set-up for reduced labor and fuel costs.

3' low profile means less time building ramps and more time unloading.

Ideal pairing with a SuperStacker.

Optional on plant diesel/gen-set available.

PORTABLE FEED SYSTEMS

Road portable, quick set-up

Feeds your crushing or wash plant.

Numerous sizes and options available.

Blend different materials at a controlled rate.

HOPPER FEEDERS

Loader feed your material.

Metered feed rate.

Optional scalping grizzly available.

TUNNEL FEED SYSTEMS

Pre-fabricated tunnel provide quick installation.

Heavy-duty construction ensures the system will not settle or deform.

Numerous feeding options available.
