POSITION: TECHNICAL DESIGN SPECIALIST

DEPARTMENT: ENGINEERING

REPORTS TO: TECHNICAL PUBLICATIONS MANAGER

UPDATED: OCTOBER 16, 2017

Basic Function
Use knowledge of current design and engineering and publishing software to produce visual materials for technical manuals, replacement parts manuals, technical bulletins, packaging & labeling, and informative and instructional material for access through a variety of media outlets such as websites, CD-ROMs, and printed material.

Generates and manipulates graphic images, text from engineering drawings, and production software into consolidated and seamless information for customers and dealerships.

Must remain abreast of technological advances in the field and be able to identify areas of use in the organization. Familiar with standard concepts, practices, and procedures within engineering, production, and sales.

Primary Duties and Responsibilities
1. Prepare a replacement parts manual for each piece of Kolberg-Pioneer equipment, using the engineering bill of material, engineering models, and engineering drawings.

2. Develop artwork for decals, labels and other required materials using Adobe Illustrator.

3. Assist in creating technical documents and materials including video.

4. Determine which vendor materials should be included with each technical manual and contact necessary personnel inside and/or outside the company to obtain the materials.

5. Identify and include drawings or other information necessary for equipment set-up and installation.

6. Create, update, and maintain Engineering bulletins for all equipment.

7. Use current software to create, update, and post technical information for Company website.

8. Drawing duplication – scan and/or print.
