Dear Attendee,

Kolberg-Pioneer, Johnson Crushers International and Astec Mobile Screens have changed their safety policy for those visiting the facilities for tours and hands-on training. Please see the new safety requirements below.

For hands-on activities, attendees are **required to wear steel-toed boots with a metatarsal guard**, either internal or external. Please be sure to bring these with you, as the factory does not provide steel-toed boots. For regular visitors, the factory can provide slip-on toe guards. Attendees are also required to wear the necessary PPE including: **yellow reflective safety vest, safety glasses with side shields and hearing protection**. These items can be provided at the factory.

For questions regarding changes to the safety policy, contact Erik Schmidt at (541) 988-9514.
